

NOW IS THE TIME TO ADD WEBEX HARDWARE TO YOUR ENVIRONMENTS.

**COLLABORATION.
A LEVEL UP.**

Have you ever wished you had a better-quality image or better audio pickup in your home or office?

Maybe you need to be able to have a second screen and whiteboard from your desk?

Maybe you thought these improvements would be great but just didn't fit your budget ...

Well hesitate no longer.

Cisco's cloud video endpoints can help you achieve those needs and have added a great new promotion to help you achieve it.

Let's first address your needs as a Cisco partner.

The **Oslo 88 – NFR Program** is designed to help get the partners using the equipment internally. **With an 88% discount on all video endpoints this is a deal that is too hot to miss.** But you must act fast. This program is only designed to be active through Cisco Q1 FY 22.

*NFR purchase limits apply, does not apply to the Webex Desk Camera or headsets.

So now that you have your own company taken care of, what about your end customers? Don't they have the same issues? **Let's get the end users upgraded as well with the new Webex Cloud Device Promo for end customers.**

Please contact your Cisco team for more information.

CiscoMarketingCampaigns@ingrammicro.com | Ext. 76471

An average 50% discount

You can sell them the video hardware as part of a new solution or just sell the hardware into existing Cisco Webex customers. You don't even need to have been the one who sold them their Webex subscription to qualify them for this offer. They just need to have a Webex Subscription or a Webex + Calling Subscription for Enterprise Agreements or Active User.

Click [here](#) to learn more.

*This offer is not valid for Named User Meeting or Calling-only subscriptions. Number of endpoints cannot exceed number of users under a subscription.
