

Lease-IT!

Technology leasing and financing options from Ingram Micro

Ingram Micro has introduced Lease-IT! as an innovative solution for customers to acquire their technology in a more cost-effective and beneficial way. By using a Lease-IT! option, you can conserve upfront capital, protect your business from obsolescence and implement your solution today, while making low, fixed payments over an extended term.

Our team of dedicated leasing specialists will guide you through the process to make it simple and convenient.

Ingram Micro Differentiators

Quoting integrations—Quickly quote monthly payments and place them on your proposals; email them to us when you're ready to start the financing process. We integrate with many of our partners quoting tools which have the ability to quote a total monthly payment.

Managed services billing—In addition to billing your customer for the equipment, you can add your fixed monthly recurring charges to the invoice to provide a single invoice.

Online portal—Price out monthly payments, submit credit applications, view your open applications and portfolio of lease customers.

Digital signatures—Streamline the financing process with digital signatures. We'll email your customer a document to digitally sign and send back with just a few clicks.

Same-day funding—We strive to pay you the same day you submit signed documents.

No hidden fees—Our plain English documentation is simple to read and hides no fees.

Prompt service—Call a live representative without having to first jump through a voicemail loop. We also strive to promptly respond to email inquiries and typically approve credit applications in less than an hour.
