Lenovo

United in Security

Absolute – Endpoint Security Management

Embedded directly into Lenovo device firmware, Absolute is an endpoint visibility and control solution to ensure persistent security management and can automate endpoint hygiene to support self-healing capabilities

Endpoint Management, Device Tracking, Geo Fencing, Risk Assessment, Remote Security

SentinelOne – AI-Powered Next-gen Antivirus

Defending against tomorrow's attacks today with a patented behavioral AI agent. Automating protection, detection and remediation in a single agent allowing devices to self-heal from broad range of attacks and ransomware instantaneously

Next-gen Antivirus, Real-Time Protection, System Performance, Ransomware Prevention

WinMagic – Encryption

A highly-configurable, full-scale encryption for the enterprise environment to ensure protection of sensitive information stored on devices

Encryption/SecureDoc, Bitlocker Management, Lost/Stolen Devices, Security, Sensitive Data

Lenovo Patch – Patch for Microsoft SCCM

Lenovo Patch is an SCCM plugin that integrates directly into the console to speed up and simplify the otherwise tedious work of updating systems, BIOS, driver, and third-party software

BIOS/Driver Updates, Patch 3rd Party Applications
