

Veritas SaaS Backup

Secure, automated data protection for SaaS applications.

VERITAS™

Many organizations today are adopting SaaS-based applications for convenience, scalability or to offload capital expense. What some of these organizations don't realize is that although the responsibility for maintaining infrastructure and software has shifted to a new owner, the SaaS application vendor, the responsibility for keeping their data protected has not. Veritas SaaS Backup helps bridge the gap by providing secure and scalable data protection across a wide range of SaaS applications.

COMPREHENSIVE PROTECTION FOR SAAS DATA

- **Office 365**
 - Exchange Online—Email, in-place archive, calendar, contacts, tasks, notes, public folders.
 - OneDrive for Business—Files, folders.
 - SharePoint Online—Site collections, subsites, lists, folders, files, columns, content types, document libraries, permissions.
 - Teams—Channels, channel conversations, calendar, files, wiki, planner, notebook.
- **Dynamics 365**—Standard and custom entities for Sales, Customer Service, Field Service, Project Service Automation, Marketing.
- **Salesforce**—Standard and custom objects for Accounts, Campaigns, Cases, Contacts, Events, Leads, Notes, Opportunities, Tasks.
- **G-Suite**—Email, calendar, Google Drive, Team Drive, Google Sites, docs.

FLEXIBLE RESTORE OPTIONS

- **In-place**—Restore directly back to the source.
- **Redirect**—Restore to a different folder or user or to a different SharePoint site.
- **Download**—Extract the data and save to a local device.
- **Shared link**—Give users access to the file and allow them to download on their own.
- **PST**—Use to store emails on a local computer.

Restore at any level

- Individual item
- Folder
- Mailbox
- User account
- Teams or SharePoint site
- Tenant

PUT CONTROLS IN PLACE AS NEEDED

Flexible retention policies allow your organization to easily meet internal retention rules or external regulations. Role-based access control (RBAC) lets your administrators delegate rights to various departments or users as needed. SaaS Backup also uses SAML 2.0 for easy integration with your organization's Single Sign-On (SSO) user access management.

KEEP AN EYE ON YOUR DATA

- Job monitor reports the backup and restore status and provides details to get further insights into any failures or skipped items.
- Integration with APTARE™ IT Analytics provides advanced reporting and dashboard views.
- Audit log captures admin user activity.

EASY TO USE, EASY TO MANAGE

- **SaaS for SaaS**—Aligns with your move to SaaS-based applications, so there's no software to manage, no infrastructure to procure and no need to manage storage capacity.
- **Automate**—Provides automatic backups, alerts and addition of new users.
- **Simplify**—Lets you easily browse or search to restore at any level.

CLOUD-TO-CLOUD SECURITY AND AVAILABILITY

- Secure authentication with OAuth 2.0
- Encryption in-flight (TLS 1.2) and at-rest (256-bit AES)
- 99.9% uptime

LICENSING AND SERVICE DETAILS

SaaS Backup is licensed on a per-user basis and offers unlimited retention, unlimited storage and onboarding/implementation services for a frictionless experience. Organizations only pay for active users. Inactive user data is retained in historical backups, no license required.

ABOUT VERITAS

Veritas Technologies is a global leader in data protection and availability. Over 50,000 enterprises—including 99 of the Fortune 100—rely on us to abstract IT complexity and simplify data management. Veritas Enterprise Data Services Platform automates the protection and orchestrates the recovery of data everywhere it lives, ensures 24/7 availability of business-critical applications, and provides enterprises with the insights they need to comply with evolving data regulations. With a reputation for reliability at scale and a deployment model to fit any need, Veritas supports more than 500 data sources and over 150 storage targets, including 60 clouds.
